

Clinic AI Staff Rules Sheet

Forward Arrow Services

Clinic AI Starter Series™

Human-first AI guidance for real-world clinics.

AI Use in This Clinic — Non-Negotiable Rules

AI tools may be used to assist work.

They are not a substitute for judgment, policy, or responsibility.

Patient Data Rules (HIPAA)

- Do not enter patient information into unapproved tools
- Do not test AI tools using real patient data
- Do not copy/paste anything from the EHR into AI tools
- If unsure whether something is PHI - assume it is and stop

Safe Use Rules

- Always review AI-generated content before using it
- Never treat AI output as clinical advice
- Do not send AI-generated messages to patients without review
- Use AI for drafting - not final decisions

Not Allowed

- Using personal AI accounts for clinic work
- Using AI tools not approved by leadership
- Allowing AI tools to connect to clinic systems without review
- Trusting AI output without verification

What AI can be used for

- Internal notes and summaries (no patient data)
- Training materials
- Policy drafts
- General operational support

When in doubt

Stop. Ask. Do not guess.

Bottom Line

*If you wouldn't put it on a public website,
don't put it into an AI tool.*
